## Managing Healthcare Systems

Health administrators are healthcare professionals who play an important role in managing public health systems, healthcare systems and hospital networks. They are typically responsible for budgeting, accounting, human resources, marketing and training. Health administrators ensure that healthcare facilities and health systems are running smoothly so that the highest quality of healthcare can be delivered.

## Health Services Administration at UCF

UCF offers a Master of Health Administration. The program offers all of its courses at night, to accommodate professionals with busy schedules during the day.

### Curriculum

The 51-credit hour Master of Health Administration emphasizes leadership in career progression, as well as strategic and operational management and development of healthcare organizations. Students can enroll in the program on a full-time or part-time basis, completing the degree in two to three-and-a-half years.

### Faculty

The program's faculty members have expertise in health policy, healthcare leadership, international health systems, long-term quality care and information management.

# GRADUATE PROGRAM IN **HEALTH ADMINISTRATION**

## DID YOU KNOW?

Employment of medical and health services managers is projected to grow 32% through 2023, making it the fastest growing industry in the US, much faster than the average for all occupations, according to the U.S. Bureau of Labor Statistics.

## What can I do with this degree?

Career opportunities for health administrators are vastly diverse. While many work in a hospital setting, many more are often employed by other types of health care facilities and organizations, including nursing homes and assisted living facilities, ambulatory surgical centers, birthing centers, physician group practices, public health centers, and free-standing clinics.

Health administrators may also find opportunities at state and county health departments as well as at organizations that do business with health care facilities, such as insurance companies, software companies, pharmaceutical companies, and research and development firms.
